Chemical Physics Letters (ISSN 0009-2614). For 1995, volumes 229–245 are scheduled for publication. Subscription prices are available upon request from the publisher. Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by surface mail except to the following countries where air delivery via SAL is ensured: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, PR China, Singapore, South Africa, South Korea, Taiwan, Thailand, USA. For all other countries airmail rates are available upon request. Claims for missing issues must be made within six months of our publication (mailing) date. Please address all your requests regarding orders and subscription queries to: Elsevier Science B.V., Journal Department, P.O. Box 211, 1000 AE Amsterdam, The Netherlands. Tel.: 31-20-4853642, fax: 31-20-4853598.

*US mailing notice – Chemical Physics Letters* (ISSN 0009-2614) is published weekly by Elsevier Science B.V., Molenwerf 1, P.O. Box 211, 1000 AE Amsterdam. Annual subscription price in the USA US$ 5279.00, including air speed delivery, valid in North, Central and South America only. Second class postage paid at Jamaica, NY 11431. USA POSTMASTERS: Send address changes to Chemical Physics Letters, Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Airfreight and mailing in the USA by Publication Expediting.

*Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.*

Special regulations for readers in the USA – *This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. The fee indicated on the first page of an article in this issue will apply retroactively to all articles published in the journal, regardless of the year of publication. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.*

# FULLERENES

the number of scientific publications grows daily it becomes increasingly important to trace the st interesting research results in an efficient way. Elsevier Science started a current awareness vice on fullerenes to tackle this problem in this specific scientific field. The so-called **Fullerene NTENTS Alert** is a *free electronic service*. It enables you to carry out time-saving searches on a nthly basis.

e **Fullerene CONTENTS Alert** is a current awareness service which delivers, through electronic il, titles and abstracts of papers accepted for publication in a number of journals. Not only will you eive this information *before or upon publication* of the actual paper but you can also browse through abstracts at your own terminal whenever it suits **you** best.

llerene **CONTENTS Alert** covers papers on fullerenes which are accepted for publication in one of following journals:

*rbon*

*emical Physics Letters*

*rnal of the Physics and Chemistry of Solids*

*ysics Letters A*

*lid State Communications*

*nthetic Metals*

*in Solid Films*

*Chemical Physics*

*Journal of Chromatography*

*Journal of Mass Spectrometry*

*Physica C*

*Surface Science*

*Thermochimica Acta*

*e above-mentioned journals covered over 25% of all papers published on fullerenes in 1992.*

bscribe now to this free electronic service and stay informed on papers you can not afford to miss.

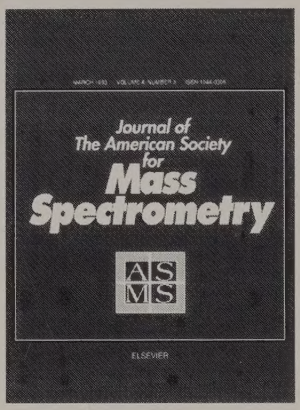
# 2 Comprehensive Mass Spectrometry Journals from Elsevier Science...



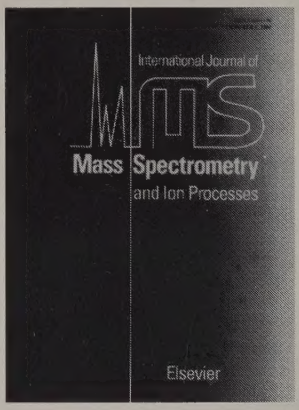
## JOURNAL OF THE AMERICAN SOCIETY FOR MASS SPECTROMETRY

Editor-in-Chief:
**MICHAEL L. GROSS**
Washington University
St. Louis, Missouri

**The Journal of the American Society for Mass Spectrometry (JASMS)** covers the full spectrum of mass spectrometry, publishing refereed, original research papers on both fundamentals and applications.

Backed by the largest and most prestigious society in mass spectrometry, the American Society for Mass Spectrometry, **JASMS** was recently ranked second among 46 analytical chemistry journals and third among 29 spectroscopy journals by the Institute for Scientific Information®. After only five years of publication, the journal has an impressive impact factor of 3.298 in 1993. Send for your sample copy today.

**ISSN 1044-0305**
Volume 6, 12 Issues, 1995



## INTERNATIONAL JOURNAL OF MASS SPECTROMETRY AND ION PROCESSES

Editors:
**M.T. BOWERS**
University of California
Santa Barbara, California
**H. SCHWARZ,** Technical University
Berlin, Germany
**J.F.J. TODD,** University of Kent at
Canterbury, Canterbury, U.K.

Cited over 4,000 times in 1993, the **International Journal of Mass Spectrometry and Ion Processes (IJMSIP)** publishes papers dealing with fundamental aspects of mass spectrometry and ion processes, and the study of the application of mass spectrometric techniques to specific problems. A truly broad, international resource with rapid publication (regular papers are usually published within 4½ months; letters within 6-8 weeks), **IJMSIP** will keep you at the forefront of new developments in the rapidly-expanding field of mass spectrometry. Send for a sample copy today.

**ISSN 0168-1176**
Volumes 141-151, 33 issues, 1995
